Lancaster Farming

VOL. 16 NO. 41 | Lancaster Farming, Saturday, September 4, 1971 | $2.00 Per Year

Blight Reported Relatively Stable Nationally, But Spreads In the East

Generally dry weather has slowed the development and spread of Southern Corn Leaf Blight (SCLB) in the Western Corn Belt, the National Federal-State Information Center on Corn Blight reported last week Only slight increases in infection were reported in Nebraska, Minnesota, Iowa, South Dakota, Missouri, Kansas, and Michigan

Some increase in severity of the disease was also reported in Eastern Illinois, in Southwestern and Northern Indiana, and Northwestern Ohio. SCLB also showed a slight increase in spread in West Virginia and Virginia.

Plant pathologists in Pennsylvania, Maryland, Delaware, and New Jersey reported rapid spread with severe infection occurring in susceptible varieties of corn. Some increase in husk, ear, and stalk infecion was reported in nearly all corn producing states in the Midwest and East.

In states where corn harvest has already begun, farmers report dififculty in harvesting blends of resistant and susceptible corn. The resistant varieties are still fairly green and contain a relatively high percentage of moisture. Susceptible varieties are dry and stalks and ears tend to break off, resulting in substantial harvest loss in some cases. Where ear and cob infection is severe, the ears tend to shatter, often resulting in severe grain loss.

In some Eastern states, infected fields are being harvested for silage earlier than normal because of severe infection.

The disease was reported for the first time in Massachusetts, increasing to 33 the total number of States now reporting SCLB.

Following is a State-by-State summary of the current blight situation:

Illinois: Only slight increase in husk and stalk infection, with ear infection decreasing as crop matures and husks dry out. Most extensive damage overall has occurred in Eastern and East Central areas of the State.

Iowa: Disease development at a virtual standstill, with only a very slight increase in stalk and husk infection. Very little disease penetration through husks to kernels.

Indiana: Stalk, husk, and ear infection developing quite rapidly in Southwestern part of the State Some increase in infection in Eastern and Northern counties.

Nebraska Very little development of SCLB during the past week Some husk and ear infection in lowland fields near the Missouri River Ear and stalk infection still minor

Minnesota Overall level of infection still very low

Ohio Slight increase in infection levels in Southern and Southwestern Ohio, with some severely infected pockets occurring in the Northwestern part of the State

Missouri: Disease spreading slightly, but has slowed during the past week Husk infection present, but spread to kernels and cob has slowed

Wisconsin· Some severe infection in lowland fields. Disease generally confined to lower half of plant leaves, but some infection is occurring on husks with penetration to kernels.

South Dakota· Slight increase in the level of infection, primarily in irrigated areas. Some husk and ear infection.

Michigan: No appreciable increase in blight. Minor stalk and husk infection occurring in Southern tier of counties. Some corn in Central part of the State has been cut for silage or abandoned due to severe drought damage.

Kentucky. Blight has destroyed some fields of susceptible corn in lowland and river bottom areas. However, blight-susceptible varieties make up only a small percentage of the total crop.

West Virginia: Slight increase in level of SCLB, with some infection of leaf sheath and outer layers of the husk.

Virginia: Some blight spread in Western part of the State. Heaviest infection occurring in Eastern counties, with some severely infected fields. Some corn now being haorvested for grain.

New York: Blight reported in 16 counties, with infection light and spotty. Slight spread occurring.

Pennsylvania: Disease spreading rapidly, with many fields in Southeastern part of the State completely dead Virtually all sus-

Peach, Apple Market Office Opened by USDA

A federal-state peach and apple seasonal market news office was opened in Martinsburg W Va. on July 28 by the U S Department of Agriculture's Consumer and Marketing Service.

H B Buchanan, the veterar market news reporter who heads this office, will issue a daily market report until the end of April, 1972

The report includes peach and apple shipping point prices for the Appalachian District (Virginia, eastern West Virginia, western Maryland, and southern Pennsylvania), as well as supply and terminal market information

Growers, dealers, and others who need the report can beplaced on the mailing list by contacting H B Buchanan, Market News Office, C&MS, P O Box 1112, Martinsburg, W Va 25401

Peach and apple information is also available by telephone Buchanan's two telephone numbers are (304) 267-7375 and (304) 267-8606.

Farm Calendar

Monday, September 6
Labor Day.

Friday, September 10
7 p.m. — Pennsylvania Egg Marketing Association meeting, Sheraton-Conestoga Inn, Lancaster.

Dairy Banquet Slated

The countywide dairy banquet has been scheduled November 5 at the Farm and Home Center. Banquet details are being finalized.

The new Pennsylvania Poultry Queen, Joy Eileen Nickerle, Montgomery County, is shown being crowned last Saturday evening at Hershey Park by outgoing Poultry Queen Betsy Jane Ellsworth. Miss Nickerle, the daughter of an egg producer, is a co-ed at King's College, New York. Other contestants were: Linda Kay Hess, Lancaster County, Susan Jane Spicer, Sue Ann Weiss, Carol Schlosnagle, Bo Ann Myers, and Joann Elder.

Pork Cookout King Contest Slated

The annual Lancaster County Pork Cookout King contest has been scheduled for 7:15 p.m Thursday, September 23 at Tent City, Ephrata Fair.

Entry deadline is September 18 through Robert Armstrong, Drumore RD1 17518, or phone (717) 548-2285.

The event is sponsored by the Lancaster County Swine Producers Association Judges are Mrs Doris Thomas, Lancaster County Extension home economist, and Robert Malick, WGAL-TV.

The rules are the same as last year. The contestant must be a male over 12 years old, a resident of Pennsylvania, use a Pennsylvania quality product, show originality in selection of products used, and prepare a dish with appetite appeal.

Winners go on to the state contest. The contestant must furnish his own equipment and pork, along with a typed and printed recipe. Entries must be ready for judging by 7 15 p m.

Osborne Named State Milk Marketer; Referendum Sought in February

Edison W. Osborne, Peach Bottom dairy farmer, has been named milk marketing specialist for the Pennsylvania Department of Agriculture.

Osborne's recent appointment coincides with a proposed milk referendum in February. The referendum could result in a statewide five-cent-per-100-pound check-off for milk promotion purposes by next April.

Governor Milton Shapp Tuesday signed legislation passed recently by the legislature amending the Agricultural Commodities Act of 1968. The 1968 Act made it possible for check-off of funds for promotion of commodities.

Under the amendments now in effect, the necessary vote to approve a check-off has been lowered from two-thirds to a simple majority and cooperatives have been given the authority for "representative" voting or "block" voting of their members.

The 20-member Market Development Committee, chaired by Jack Kooker, of the Berks County Dairy Farmers Assn., has already requested the Secretary of Agriculture, James McHale, to hold a milk referendum to allow farmers to vote for a five-cent check-off. If the check-off is approved, the market committee would also, in cooperation with the Secretary of Agriculture, determine how to spend the money which is raised by the check-off.

A hearing is expected October 28 at Harrisburg to officially determine if a milk referendum is needed A similar hearing was held in Albany last week on a similarly proposed referendum in New York

If a referendum is found to be needed, it is expected to be held in mid-February. If approved by farmers, it would probably go into effect about the first of April, Osborne explained

Osborne noted that many local dairy groups are already contributing five cents for milk promotion

If the referendum is adopted, this would make everybody contribute "instead of a few," he said.

Osborne said that about $750,000 per year is raised for promotion in Pennsylvania under the present voluntary program If a referendum is approved, the total would reach about $3,400,000 a year, he said.

Osborne explained that study of milk market conditions indicates that the five-cent rate would be sufficient to have an impact on milk marketing He noted that the voluntary programs in most of the neighboring states also are approximately at this rate

Osborne indicates that his new position as milk marketing specialist will involve working closely with dairy organizations throughout the state in promoting the referendum. He will also work closely with the Market Development Committee

While Osborne presently is the only state employe working exclusively with milk marketing, he will work with and be assisted by others in the state market development section under Donald Cunnion

New York Eggs

Wednesday, September 1

Prices trended lower on mediums Undertone continues weak and unsettled although there was a faint glimmer of hope noticeable locally as fancy large and extra large supplies moved into a more favorable supply-demand balance. However, large, not of top fancy quality, are liberal and trade indicates strong possibility of arrivals from future board deliveries. Mediums and smalls still at burdensome proportions despite attractive pricing of mediums at retail levels in this morning news media and scheduling of more early next week. Wholesale movement locally is still slow and unaggressive while carton orders varied from slow to occasionally good.

Local Grain

Thursday, September 2

These prices are made up of the average prices quoted by six participating local feed and grain concerns. It should be noted, however, that not every dealer handles each commodity. All prices are per bushel, except for ear corn which is per ton.

The average local grain prices quoted Thursday, September 2, are as follows·

	Bid*	Offered*
Ear Corn	43 00	48 33
Shelled Corn	1 43	1 62
Oats (local	69	79
Barley	1 01	1 21
Wheat	1 41	1 59

*Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

Green Dragon Hay Market

Friday, August 27

Six loads hay, including Two loads Alfalfa, 38 00-42 00; load Timothy, 30.50; load Clover, 38-50; two loads Mixed hay, 31 50 and 33.00.

Three loads straw, 28 50-37 00,

Three loads ear corn, 48 00-50 50.

1972 Wheat Program Outlined

Domestic wheat allotments for 1972 were mailed to 3,673 farms in the County on August 31.

These allotments do not limit the acreage of wheat that may be grown They are established to determine the acreage that must be set-aside and the payments that can be earned under the 1972 Wheat Program. The 1972 domestic wheat allotment for Lancaster County is 12,135 acres, according to Miss Dorothy Neel, ASCS executive director.

Basically, the wheat program is similar to 1971. There is no limit on acreage. To participate a farmer must set-aside 83 per cent of the farm domestic allotment, and maintain the Conserving Base established for the farm

About 850 acres of wheat allotment will be lost in the county because farmers did not plant 90 per cent of the allotment in 1971, or else did not report the acreage to the office For 1971, corn or grain sorghum in excess of 50 per cent of the feed grain base, could be considered wheat acreage for history purposes For 1972, barley is considered a feed grain and can be substituted for wheat acreage. Also, acreage planted to soybeans will be considered planted to wheat or feed grain, if needed for history preservation.

Allotments were reduced 20 per cent from 1971 on those farms that received "zero" as planted or considered planted to wheat in 1971. After three years of "zero" planting, the wheat allotment will be dropped.

Basic provisions for proven wheat yields are still in effect A farmer may elect to establish a yield based on actual production, rather than the one established by the County Committee on a judgment basis. The base period for establishing 1972 wheat yields is 1968, 1969 and 1970.

To prove the yield, a farmer must have planted and harvested wheat acreage in each of these three years, and be able to provide reliable proof of production on the harvested acres. A written request must be filed by September 15.

The signup period for the 1972 wheat program will be February 28 through April 7, 1972. All farm operators who wish to participate in the program must come to the county ASCS office at that time and sign their intentions to participate.

Blight Reported

(Continued from Page 1)

ceptible corn shows some level of infection

Maryland; Delaware· Blight increasing rapidly in both States Some fields in Delaware completely destroyed

North Carolina, South Carolina· Corn crop generally good. SCLB-susceptible corn badly damaged, except where it was harvested for silage. North Carolina reports considerable stalk and husk infection, with the disease penetrating through the husk and kernels into the cob in many instances

The Blight Information Center, established by the U S Department of Agriculture in cooperation with State Agricultural Experiment Stations and State Extension Services, coordinates blight information nationally

Masonic Homes Cows Are Cited

A junior three-year old registered Ayrshire cow named Masonic Homes Lo Betsy has completed an official milk production record of 17,200 pounds, with 642 pounds of butterfat on twice daily milking for 305-day DHIR testing period, announces the Ayrshire Breeders' Association.

Also in the Masonic Homes Farm herd of Elizabethtown are the following cows and their records:

Meredith Sun Peg, an eight year old cow, 16,910 pounds of milk, 676 pounds of butterfat; Masonic Homes Ninah B. a junior yearling three year old, 16,430 pounds milk, 632 pounds butterfat; Masonic Homes Hi Pat, senior yearling three year old, 15,950 pounds milk, 628 pounds butterfat.

Masonic Homes Hianna, junior yearling two year old, 14,370 pounds milk, 550 pounds butterfat; Wauwatosa's Flashy Gertie, junior yearling three year old, 14,200 pounds milk, 553 pounds butterfat; Masonic Homes Miss Prim, junior yearling two year old, 13,690 pounds milk, 540 pounds butterfat, and Masonic Homes Royal Harriett, senior yearling four year old, 13,300 pounds milk, 611 pounds butterfat.

Hospital-Related Health Center Will Open in Quarryville Oct. 1

A site has been selected in Quarryville and renovations started toward an October 1 opening of a new health facility for Southern Lancaster County.

Under the direct supervision of the Lancaster General Hospital, the new clinic will be located at 1 E Fourth St, Quarryville, until recently the parsonage of the nearby United Church of Christ

Renovations of the large two story brick structure were slated to begin this week

The actual medical care will be dispensed by five young physicians under the direction of Dr Henry Wentz

The five physicians he will direct are Dr John A Wolgemuth, Dr R Clair Weaver, Dr Rogers D McLane, Dr J Kenneth Brubaker, and Dr John W Breneman All five have completed their required training as medical doctors and are qualified to set up practice anywhere as physicians, Dr Wentz emphasized this week

But the five are participating in a special Lancaster General Hospital three year program for family doctors under the direction of Dr Wentz and Dr Nikitas J Zervanos The five have just completed the first year They will spend the remaining two years, if they so choose, receiving further training at the hospital and practicing at the new Quarryville clinic

When they begin at the clinic October 1, at least one of them will be on duty from 2 p m until 10 a m weekdays, with someone there on call on weekends

Regular medical service now available in the Quarryville area will continue This includes Dr Robert Helm and Dr Charles Bair, both M D 's, and Dr Paul Herr, Osteopath, all practicing in Quarryville

The program is being emphasized as a supplemental program to the health care now available in the area Citizens currently are conducting a fund drive to help make the program available

Two physicians serving the Quarryville area have died within the past year or so, causing what is considered to be an acute shortage of doctors in the area

In addition, Dr Bair, who is regarded as one of the leading proponents of the new plan, has been ill this summer and has announced that he is sharply cutting back on the volume of service he will be able to give. He said that he is no longer handling maternity cases, has cut out morning hours, and is cutting down on outside calls.

Dr. Bair this week praised the new clinic as an important step in helping to meet the medical needs of Southern Lancaster County and said, "I think it's fortunate the medical schools are finally beginning to realize the importance of family practice."

He stated that while the new program will directly meet medical needs, he thinks the ong-term benefit will be in inducing some of the young men who serve at the clinic to remain in the Quarryville area full time later

Dr Bair also said he believes that while the Quarryville area now has only three doctors, it could use six, possibly seven

But Dr. Wentz pointed out this week that, at least initially, he expects the clinic to be able to handle the equivalent of the load of only about one doctor He emphasized, however, that the program is just getting started and will be flexible, with possibility of expansion in the future

He pointed out, for instance, that additional young doctors will be entering the program next year and in future years, with the possibility of retaining the present five for another year

The actual health program planned through the clinic involves rotating the five doctors, each serving approximately one full day a week at the clinic. Dr. Wentz himself will also be a resident physician practicing at the clinic. He will work closely with the five doctors, particularly during office hours.

In addition, the five will continue to attend conferences and receive additional training at Lancaster General and will have the facilities and staff of the hospital available to assist them.

In explaining the importance of the clinic to Lancaster General Hospital, Dr. Wentz said it will: simulate the private physician's office; educate and train the resident physicians in family medicine; alleviate some of the area's medical needs; encourage physicians to practice in rural areas; help innovate new methods of health care delivery and health care management.

Dr. Wentz pointed out that the concept of modern medicine is preventive medicine. "This implies a complete medical evaluation of disease to detect it early and prevent disease wherever possible."

Each doctor will take care of a specific number of families,

(Continued on Page 23)

Members of the committee which has been working to improve medical care in Southern Lancaster County and leading a fund drive to bring better Health Care to the area are, left to right, front row: Mrs. Harold Stokes, Rawlinsville Area Women's Club; Mrs. Ernest Shaub, secretary, Lancaster County Farm Women Society; Mrs. Martin Greenleaf, Colerain Literary Society and Union Presbyterian Church; Mrs. Leroy Wenger, Community Action Program; second row, Lester H. Warfel, Quarryville Rotary Club; Clifford Holloway, Fulton Grange 66; John C. Hoffman, Quarryville Lions Club; P. Harold Freiberg, Tucquan Lions Club; back row, Paul Gassert, Quarryville Chamber of Commerce; Dr. Russell C. Eroh, secretary, Solanco Ministers Fellowship, and Jesse Cutler, committee chairman. Committee members absent when the photo was taken at the new medical center site Monday are: George Brinley, committee finance chairman, Tucquan Lions Club; Rev. John R. Campion, Solanco Ministerial Fellowship; Mrs. Everett Kreider, local Farm Women Society; William Tucker Jr, Quarryville Junior Chamber of Commerce, and Mrs. Harold Schaub, Holtwood Women's Association.

Dr. Charles Bair, long-time Quarryville physician, this week described the new Quarryville health center as a major step forward in meeting the health needs of Southern Lancaster County.

111 Progressive Parties Held

Some 111 progressive parties by the Fulton Grange 66 for the benefit of the Southern Lancaster County family health Center have brought in $1,581.58, it was reported this week

George Brinley, treasurer of the health center fund, said total proceeds from all sources has reached $4,420.16.

Progressive parties held through August 23 include: Mr. and Mrs. J. Ernest Nissley, Mr. and Mrs. Harold Stokes, Mr. and Mrs. J. Marlin Kreider, Mr. and Mrs. Jacob Gicker, Mr. and Mrs Robert Clark, Mr. and Mrs. Caleb M. Wenger, Mr. and Mrs. Jerald Neff, Mr. and Mrs. Claude F. Hart, Mr. and Mrs. Robert Hershberger, Mr. and Mrs Clayton E Kreider, Mr. and Mrs Robert K. Hess, Mr. and Mrs. Lester Keener, Mr. and Mrs. Melvin V. Shenk, Mr. and Mrs. Daniel W. Metzler, Mr. and Mrs. Robert C. Best, Mr. and Mrs. R. Edwin Harnish, Mr. and Mrs. Daniel R Stokes, Mr. and Mrs Frank Graver, Mr. and Mrs. Robert Badger, Mr. and Mrs. Amos Wade, Mr. and Mrs. Carroll Baker, Mrs. Evelyn V. Byers, Mr. and Mrs. Richard B. Lefever, Mr. and Mrs LeRoy Stumpf, Mr. and Mrs. Paul M. Rineer, Mr. and Mrs. Gail Campbell.

There were also two donations to the fund amounting to $40, the one being in memory of the late Mrs. W. Benjamin Myers by her friends and neighbors.

Stars' Colors

Their colors are indications of star temperatures and also tell which of the elements make up the stars. As a rule, the blue and the white stars are the hottest, while the red ones are the cooler stars.

It's a Rule

The U.S. Constitution prohibits either house of Congress from adjourning more than three days—not counting Sundays—without the consent of the other.

Spearing tobacco will be a common sight in Lancaster County fields for the next few weeks.

Annual Tobacco Harvest Is Underway

Lancaster County tobacco harvest proceeded rapidly this week, although weather conditions were generally unfavorable.

Max Smith, Lancaster County ag agent, estimated about one-third of the crop had been harvested by Thursday of this week.

He said most reports from farmers indicate an over-all good crop with plenty of weight.

He said the harvest is a little late because of cool weather in the early part of the growing season

Recent cloudy and cool weather also has hampered harvest For both cutting and curing, farmers need dry, breezy and sunny weather, he said

Up, up goes the tobacco this week. Working as a three man chain, Bill Fisher, bottom, hands a lath of tobacco to Dean Eshleman, while Warren Eshleman, top, stacks the previous lath near the roof of his tall tobacco barn. By keeping the tobacco flowing steadily toward the ceiling, the three quickly unloaded a wagon of tobacco and stacked it for curing.

Out in the field, youths load a tobacco wagon.

One of several of Warren Eshleman's tobacco wagons awaits its turn to be loaded with tobacco. A half dozen youths are spearing tobacco on laths in the background. Eshleman is growing 20 acres of tobacco at 825 Beaver Valley Pike this year and he began harvesting Monday.

On Using Soil Tests

Lack of sufficient lime is responsible for up to 80 per cent of the severe losses in crop production in fields of Pennsylvania, research at Pennsylvania State University indicates.

Newton J. Bair, graduate assistant in agronomy at Penn State, described such findings August 19 at joint meetings of the American Society of Agronomy, Crop Science Society of America, and Soil Science Society of America in New York City.

Bair studied 60 Pennsylvania farms, where each had a crop failure in a large portion of one or more fields. First, he examined available records on past soil management and studied soil characteristics in the fields. Then he tested in the fields for soil pH and phosphorus, plant phosphorus, potassium, and nitrate nitrogen.

"I was surprised and rather disappointed to find so many problems associated with a need for lime," he stated.

Laboratory analyses of soils and plants from good versus poor areas confirmed his field observations. There were no cases of trace element deficiencies. There were cases where very high nitrate nitrogen levels existed in soils given heavy applications of manure. In at least one case the high nitrate level in forage created animal health problems.

Based on his studies, Bair recommended that farmers obtain soil testing kits from their county offices of the Cooperative Extension Service. Soils should be tested and recommendations followed.

Development of diagnostic procedures to explain why crop failures occur in part of soil testing research done by the faculty and staff of the Agricultural Experiment Station at Penn State.

It may seem to some that this long-standing recommendation, by Extension officials, Lancaster Farming and most leading crop authorities, is overdone. But we think the importance of a soil testing program cannot be overemphasized.

Soil testing should be considered as just one more tool available to help the farmer take the guess-work out of his farming and enable him to get high crop yields year after year.

The advantage of soil testing is far greater than simply eliminating the prospect of a very poor crop.

By applying lime and fertilizer at rates which the soil actually needs, rather than guessing and giving the soil what the farmer guesses it needs, there may actually be instances where the farmer will find he doesn't need to apply as much lime and fertilizer as he thinks is needed. This can result in a direct savings.

Much more frequently, we expect, he will find his soil needs more of some elements and less of others than he had planned. This means that by simply changing the relative amounts of the various elements, he can get much better crop yields at little or no extra cost.

As crops take nutrients from the soil, the ability of the particular soil to grow a particular crop may change drastically over the years. Only through yearly soil tests can the farmer know for sure what the changes are and how to correct them in advance. Without tests, he is guessing and if his guess is wrong, he will have to accept one or more years of reduced crop yield before he can make adjustments based on crop experience.

We find that growing numbers of farmers who expect top yields, such as 125 to 150 bushels of corn or more per acre, are increasingly turning to soil tests as a necessary and low cost tool to help them.

As the cost-squeeze continues, as farmers are asked to become increasingly efficient and productive on scarce acreage, we think more and more farmers will see soil testing as one of the easiest, least costly and fastest means of getting to where they want to go.

Steady Costs, Rising Demand?

Our reports continue to indicate a record or near-record grain harvest nationally this fall.

Despite extensive blight damage to some individual corn fields in Southeastern Pennsylvania, the situation nationally will almost certainly be a much larger corn crop than last year and it will likely be the biggest crop ever.

In addition, production of many other grains is expected to be considerably above last year. This includes barley, up 13 per cent; wheat up 12 per cent; grain sorghum, up 31 per cent, according to a report by H. Louis Moore, Penn State marketing specialist. Only oats, of the major grain crops, is expected to be down, and only be six per cent. These are the latest figures, which will be changing as the crops are actually harvested.

The record corn harvest in the U.S. was 4.7 billion bushels in 1967. Most projections we have seen so far indicate a harvest of 5 0 to 5.5 billion bushels. This compares with only 4.1 billion bushels last year.

The much larger harvest this year is expected to be the result of a combination of two major factors. First, the acreage planted for corn is considerably higher, an estimated 11 per cent, than last year Second, yields are expected to be considerably higher than last year, when combination of blight and drought kept average corn yields to 71.8 bushels per acre. The previous year, in 1969, the average was 83.9 bushels and this is expected to be closer to the 1971 average. Moore's report notes that the 1969 yield level would result in a 5.4 billion bushels crop this year.

Pennsylvania's corn acreage is estimated at 1.47 million acres, up 13 per cent from last year and 17.5 per cent above 1969. This means that Pennsylvania, like the nation as a whole, potentially has a much larger crop than in 1970 and that considerable blight loss can be sustained without dropping the total corn crop below 1970 levels.

It would appear at this point that the coming year may be nearly a complete reversal of the past year in terms of crop and livestock prices.

During the past year, feed costs were steadily rising, putting tremendous pressures on livestock producers to maintain profit margins As a result, there has been a tendency to hold back livestock numbers in recent months.

The cost squeeze which resulted from high and rising costs was reinforced by declining or relatively stable consumer demands because of high unemployment and generally unfavorable economic conditions nationally.

But during the next year, it increasingly appears as if livestock producers will see declining, or at least stable, feed prices.

Indications have been that the economy is beginning to pick up steam with unemployment being reduced. This should result in increasing demand for meat and poultry products.

The combination of lower costs and rising demand should spell favorable livestock markets for the next six to 12 months.

After that, the expectation should be for farmers to begin increasing livestock and poultry numbers to take advantage of better profit margins.

This situation could turn out to be somewhat different, of course, if something happens that the national grain output is not as good as expected, or if the economy does not continue to develop as expected. Otherwise, the general trends should be self-evident.

NOW IS THE TIME..

By Max Smith
Lancaster County Agent

To Beware Of Silo Gas

We repeat this word of caution concerning various poisonous gases that may develop at silo filling time. With blighted corn and with corn that has had heavy applications of nitrogen fertilizer, we have a chance of heavier gas formation. From the time the silo filling operation starts until at least 10 days following the process, all members of the farm family should be warned to stay out of and away from the silo. Most gases are heavier than air and will come down into the silo chute or settle on the surface of a partly-filled silo; this is the reason for keeping out of the silo during the filling operation until the blower has been running for at least 10 to 15 minutes. Some of the gases are yellow and some are colorless; most of them have the odor of laundry bleaching materials. Don't take chances and be on the alert for the gas formations.

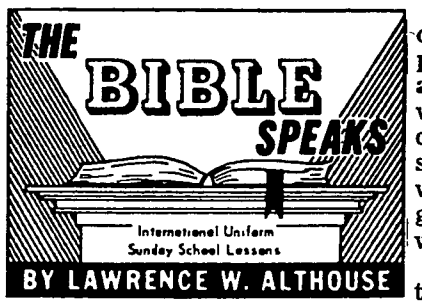
To Protect Farm Machinery

The current growing season is coming to an end and many pieces of farm machinery will not be used until next year. Good farm management requires the storing ot fhe machinery in a place under roof and out of the weather. If the machinery can be kept dry, it will last much longer. Rust is the main enemy of most machinery and will shorten its usefullness. It's not too late to construct a pole shed or some other structure under which to put the farm machinery. The storing of the machinery in barns is a common practice, but increases losses in case of fire. The greasing of all working parts is also a part of good machinery storage.

To Manage Alfalfa Carefully

The decison as to when to make the last cutting of alfalfa is often difficult and can effect next year's production. Many research experiments reveal that if a field is to remain for another year in alfalfa, it should not be cut after the middle of September in this part of the country. We realize that many fields have been cut late in September and when weather conditions permit another 6 to 10 inches of growth before a killing frost, there appears to be less damage done. However, if cold weather arrives soon after the crop is removed late in September, the damage may occur. It is advised not to take any alfalfa cutting after mid-September for best results. The removal of the crop several days after a killing frost may do less damage than just prior to the frost, but weather conditions late in the fall are not favorable for good hay making.

LANCASTER FARMING ADS PAY



THE UNKNOWN

Lesson for September 5, 1971

Background Scripture: Psalms 42, 53, 139, Acts 14 15-17, 17 22 31
Devotional Reading Psalms 111

What is God really like?

When the Apostle Paul went to Athens, he went to a city where men did a great deal of speculating on this question The Areopagus, which in English we call Mar's Hill, was a place where a group of philosophers met for discussion and debate Paul went to that hill so he might speak to the men gathered there.

Rev. Althouse

"Men of Athens, I perceive that in every way you are very religious" (Acts 17 22)

The meaning of "religious"

What did Paul mean by this? Did he mean that he had witnessed their religious rituals and rites? Did he mean that he had observed very pious living in Athens? No, he meant neither of these. What he meant was that he had observed that they were very much preoccupied with the question, "What is God like?" The Greeks in general and the Athenians in particular were known for their great curiosity about the meaning of life

Sometimes this word "religious" gives us a great deal of difficulty. The reason is that people often mistakenly believe that a man's religion is identifiable with a particular religious group or organization Using this reasoning, we would say that a man who belongs to a church or synagogue is "religious," and the man who does not is not "religious."

But the truth of the matter is that most men (if not all) have a religion of some kind. That is, they have some definite beliefs about the meaning of life and reality. John Bright, the Biblical scholar, has defined religion in this way: "For that to which a man looks for his ultimate well-being, his salvation no less, and from which he derives his standards of conduct—that is his God."

What you worship as unknown

Thus, the question is not whether a man has a religion, but rather what kind of religion he has Throughout the city of Athens were monuments to many of the gods in which the Athenians believed At one spot he found even a monument "to an unknown god."

At this point, Paul makes a very surprising statement: "What therefore you worship as unknown, this I proclaim to you" (17.23b) By this he means that the source of life and reality does not have to be unknown. God CAN be known. No one needs to remain in the dark as to what God is really like, for the message of the "good news" can make him known to us.

That is still Christianity's message to the wondering world. Even though God is always so much more than all we can say about him, still through the person of Jesus Christ it is his will to make known the unknown and reveal himself to us.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U.S A. Released by Community Press Service.)

WASHINGTON REPORT

Congressman Edwin D. Eshleman

16th District—Pennsylvania

Preisdent Nixon's new prescription for the economy is strong medicine. But, it appears to be a proper prescription for these times.

Americans have long felt the need for a coordinated, constructive economic program that promotes consumer confidence, increased employment and inflation control, and that assures that American-made products will be competitive in both domestic and world markets. The Nixon plan for a new peacetime prosperity is designed to meet those criteria.

Some evaluations of the overhauled economic policies implied that the new measures were a tacit admission of failure for the President's past program. I don't completely buy that logic.

The inflation rate was dropping previously and the unemployment problems did appear to be coming under control. But, the public attitude toward the economy remained pessimistic, primarily because the long-term prospects for economic improvement were not affecting their daily lives.

An action program was needed to reverse the psychology of inflation and recession. The 90-day freeze on wages, prices and rents is the principal step taken by the President to deal with the inflationary psychology. The freeze can give us a breathing spell from the continued leapfrogging of wages and prices resulting from the mad national scramble to keep up with the cost-of-living. But the freeze should remain brief enough that it does not end up a bureaucratic monster which stifles future economic growth.

The psychology of recession was spoken to with several proposals to improve the job situation nationwide. Those proposals included the reinstatement of the investment tax credit to encourage industrial growth, the 10 per cent surcharge on imports to encourage Americans to buy American, and the cut in excise taxes to boost the important auto industry.

Of course, all of these moves sound admirable when discussed in a national context. But, what most people are concerned about is how they personally will be affected. Let me give you a brief summary of what the new economic policies will mean to individual citizens.

If you rent from someone, your landlord will not be permitted to raise your rent until November 12 even if the increase was previously scheduled to take effect before that date.

When you shop you will be able to buy most goods, except food and some imports, at the same price until November 12. Food prices may change slightly because grocers will be permitted to charge a price equal to the highest price the item sold for during the 30 days before the President stepped in.

Your pay will remain the same until November 12 and scheduled pay raises will not have to be paid retroactively.

If you are a farmer, your products are not subject to the freeze. That means that feed grains, fresh fruits, vegetables and the like can continue to fluctuate in price.

Businessmen may get to subtract up to a total of 10 per cent from their corporate tax bill for whatever is spent on new equipment or machinery. And contrary to some talk now being heard, most businessmen will find that their profits, in effect, have been frozen.

If you violate any of the provisions of the new policies, you can be fined $5,000. Therefore, if you have any questions, the best personal policy is to ask before you act. An office has been established in Philadelphia to answer all questions for our area. The phone number of that office is 215/524-2435.

Woods Drive 2 Miles East Of Route 501

A group of Connecticut Young Farmers are shown during a recent tour of Lancaster County discussing the trench silo feeding program on the Cliff Holloway farm. In the background is the trench and the trench silo unloader. Besides visits to southern Lancaster County farms, the trip included a tour of the New Holland Division of Sperry Rand. Hosted by the Solanco Ag Department, the Young Farmers from Woodrow Wilson High School, Middletown, Conn., included: left to right, Robert Cone, Tony Noel, Roger Lawrence (ag teacher), Richard Brock, Stephen Jenson, Robert Peace (ag teacher), Cliff Holloway, Ray Olander and Wilber Hills.

Help Us Serve You

Don't assume we know about your farm organization's meeting. To get your meeting on our Farm Calendar, it's safer to assume we don't know.

Remind us by calling 394-3047 or 626-2191 or by writing to Lancaster Farming, 22 E. Main St., Lititz, Pa. 17543. You'll be helping us to serve you better.

P.S. — If you're not sure you told us already, we don't mind hearing from you again.

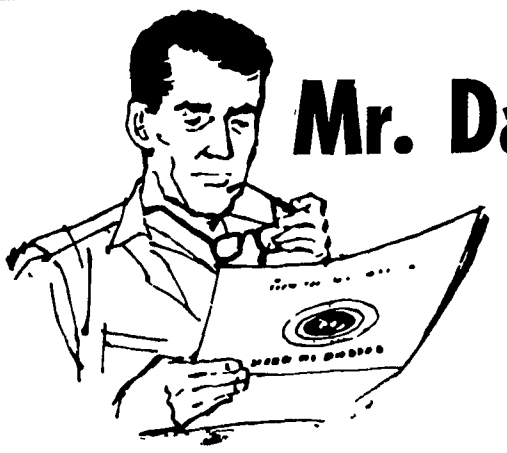
Mr. Dairyman



HOW MUCH WOULD AN EXTRA TON OF MILK PER COW MEAN TO YOU?

Many dairymen who have challenged their herds — who have fed for more milk — have found that their cows can often produce as much as 2,000 extra pounds of milk per year when fed the PIONEER way.

Management for profit the PIONEER way can mean big additional earnings for you. That's why thousands of successful dairymen rely on PIONEER feeds and feeding programs to help them milk out the total bred-in production capability of their cows — to help them get more profit from each cow.

Challenge your herd! Find out how good your cows really are. Stop in soon and talk over your production problems with us. Remember, there's a PIONEER feeding program to fit your need.

Chester Co. 4-H'ers Earn District Ayrshire, Jersey Championships

The 26th Annual Southeast District 4-H Dairy Show was held August 27 at the Allentown Fair Grounds. Nine counties participated in the event.

In Ayrshire competition, a six-year old cow, Ardrossan GLR Minerva, owned by Eddie Henley was named grand champion. He also showed a senior yearling heifer that won reserve junior championship honors. Eddie is the son of Mr. and Mrs. Kennard Henley, Cochranville.

Eddie's sister, Sharon, exhibited the junior champion Ayrshire, a senior heifer calf.

Reserve grand champion Ayrshire was a four-year old cow, Eureka Majestic Maid, shown by Tina Kulp, Pottstown. Tina is the daughter of Mr. and Mrs. Harold Kulp.

Chester County Aryshire exhibitors also showed the first place county group of four animals.

Nancy Wollaston, daughter of Mr. and Mrs. Charles Wollaston, Toughkenamon, won champion Jersey honors with her three-year old cow, Milad Maple Lawn Pollyanna. Junior champion Jersey was an intermediate heifer calf exhibited by James Wertz, Downingtown. The first place county group of four Jerseys also was an entry by Chester County exhibitors.

In Guernsey competition, reserve grand champion honors were awarded to a junior yearling heifer, Sunbeam Princess Debbie, shown by Deborah Gray, Downingtown. Debbie is the daughter of Mr. and Mrs. Willard Gray. Reserve senior champion Guernsey was a two-year old cow shown by Robert Shoff, Oxford. Chester County exhibitors also showed the first place county group of four Guernseys.

(Continued on Page 16)

Edward Henley and Tina Kulp win Ayrshire championships at the Southeastern Pennsylvania District 4-H Dairy Show August 27 at the Allentown Fair Grounds. Edward is the son of Mr. and Mrs. Kennard Henley, Cochranville, and Tina is the daughter of Mr. and Mrs. Harold Kulp, Pottstown.

Octorara FFA

Last Wednesday, August 25, Gerald Metzler, John Hollinger and Joey Underwood of the Octorara FFA Chapter took five animals to the Southeastern District FFA Dairy Show at the Farm Show Building in Harrisburg.

They competed against FFA members from the southeastern Pennsylvania counties for a chance to go to the State Junior Dairy Show in September.

Underwood showed a Guernsey intermediate heifer calf. He placed second in his class receiving a red ribbon.

Hollinger showed 2 Ayrshires. He received blue ribbons for both his senior yearling and aged cow, making him eligible to show both animals at the state show.

Metzler received a red ribbon for his senior calf and a blue for his senior yearling Holstein. He also won a master fitter award and a master showman award. His older animal is eligible for the state show.

The boys will conclude the show season with the Cecil County Fair at Fair Hill, Md., and the Unionville Fair.

The members exhibiting at either or both the Kimberton and Goshen Fairs were Don Windle, Joey Underwood, Randy Mills, Robert Mills, Gerald Metzler and John Holilnger. They showed as many as 12 animals representing three dairy breeds.

Bergstrasse Busy Bees

The Bergstrasse Busy Bees 4-H Club held a club fashion show August 25 at the Bergstrasse Lutheran Church to end the 1971 year.

The cooking club's theme was "Foods Around the World," featuring foods from different countries.

The theme for the fashion show was "4-H Goes International!"

Awards and ribbons were awarded to the members by Mrs Grant C Smith.

News Reporter,
JoAnne Hurst

Top placings in the Holstein breed from Lancaster County at last week's District 4-H Dairy Show were: John Frey, left, reserve junior champion, and Lynn Royer, first place two year old.

Spice CABINET

MOLASSES BARBECUE SAUCE

½ cup molasses (unsulfured)
½ cup prepared mustard
½ cup vinegar

Blend together molasses and mustard. Gradually stir in vinegar. Makes 1½ cups (enough for basting four broiler-fryer chickens, halved).

Stephen Horton, left, Elizabethtown, shows his 4-H grand champion Ayrshire at Harrisburg last week. Paul Walmer's calf was breed reserve junior champion.

Lancaster Co. 4-H Dairy Winners

Ellen Schmuck, Peach Bottom RD2, displayed this reserve grand champion Jersey at the District 4-H Dairy Show last week.

Q QUESTION

Will pull-type Superpicker let me bring my corn in any way I like?

A ANSWER

Yes, with 2-row Superpicker you can husk, shell or grind in wide or narrow row corn.

The versatile 2-row Superpicker has interchangeable processing units that husk, shell or grind—on the go. Corn . . . the way you want it. See Superpicker—the really versatile corn picker system.

(Continued from Page 14)

The second place county group of Brown Swiss was exhibited by Chester County; Holstein exhibitors had the fourth place county group.

Chester County 4-H members exhibited a total of 60 head of cattle at the district show. Thirty-one of these were awarded blue ribbons, and became eligible to compete at the Pennsylvania Junior Dairy Show to be held September 20 at the Farm Show Building in Harrisburg

During the course of the show, 4-H members who did an outstanding job of fitting and showing their animals were given master fitter and master showman awards. Among the recipients of the master fitter award were: Tina Kulp, Pottstown; Harry Leininger and David Nolan, both of Birchrunville; Percy Reynolds, Oxford; David Weinstock, Phoenixville; Nancy Wollaston, Toughkenamon; Susan Pepple and Patricia Devoe, both of Oxford; and James Wertz, Downingtown. Master showman were: James Wertz; Robert Nolan, Birchrunville; and Susan Weaver, Glen Moore.

Judges for the show were Harry Roth, sire analyist, Atlantic Breeders Cooperative, Lancaster, for Holstein; and M. B. Sowerby, Guernsey classifier, Princeton, N J for Jerseys, Ayrshires, Milking Shorthorn, and Brown Swiss

The Southeast District 4-H Dairy Show was sponsored by the Cooperative Extension Offices of the nine counties participating and the Cooperative Extension Service of Pennsylvania State University.

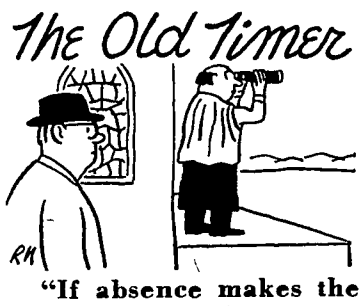
Trojan Seed Schedules

A Trojan Seed Corn field exhibition has been scheduled at a local farm from 10:30 a m. till 1:30 p m Tuesday, September 14.

Sponsored by the Carlton Seed Company, Hanover, the exhibition will be held at the Eugene G. Hoover farm just southeast of the Lancaster Airport along Route 722 Hoover is the local Trojan representative.

Hoover has invited all interested farmers to attend. The day will include a light lunch, door prizes, displays of some new tractors, fertilizer and pesticides, as well as comparisons of plots of N and T corn. There are also some good new Trojan numbers on display, Hoover said.

Hoover noted that some qualified authorities will be available to discuss corn and that all of the firm's 1972 supply will be of the N or hand-detasseled type.



"If absence makes the heart grow fonder, many people love their church."

For good production next lactation,

FEED PURINA DAIRY CONDITIONER

As a dairyman, you know that good milk production doesn't just happen. It's something you plan for by establishing a herd with the genetic potential for good production, then managing and feeding your cows so they'll produce up to their bred-in ability.

Many successful local dairymen also plan for good production with a proven program of dry cow feeding. They need Purina Dairy Conditioner, a research-proven ration to help give dry cows body condition they need for good production after they freshen.

Purina Dairy Conditioner is an extra-palatable 12½ percent protein ration. It's fortified with vitamins A and D plus extra phosphorus to help guard against milk fever.

Purina Dairy Conditioner is low-cost, too, because the amounts you feed depend on your cows' condition and on the quality of the roughages you feed. For example, a cow dried off in good condition being fed high-quality roughages would require less Dairy Conditioner than a cow in only fair condition being fed fair quality roughages.

Drop in soon and get your free copy of the Purina Dry Cow Program folder. We'll be glad to show you how Purina Dairy Conditioner can help you prepare your dry cows for good production next lactation.

WHOLESALE from McNESS
SILAGE BOOSTER

Dairy Farmer!

Erich Brendt put the same quality corn in two silos last year. He added McNESS silage booster to the one silo. This silage tested 9.73 lbs. more protein per ton. "More then $3.00 returned for every $1.00 invested on protein alone."

MANY OTHER ADVANTAGES

Walter Wendt Says . . . We had no reason to believe we could improve our silage until we finally tried McNESS. Today I would not think of putting up any type of silage without it.

Advantages are even greater on blighted or immature corn.

ASCS Named to Receive Price, Wage Inquiries

The U.S. Department of Agriculture's Agricultural Stabilization and Conservation Service offices in counties throughout the Nation have been designated as receiving centers for inquires by rural citizens concerning the Presidential order of August 15 on prices, rents, wages and salaries.

This was announced recently in a joint statement by the Office of Emergency Preparedness and Secretary of Agriculture Clifford M. Hardin.

The ASCS county offices will act as information centers to the extent that official replies are available to questions submitted by the public on the operation and interpretation of the Presidential order.

Inquires for which the local ASCS office has no answers, as well as all complaints. will be forwarded to the nearest district or subdistrict office of the Internal Revenue Service. In no case will the local ASCS office attempt to resolve complaints or make interpretations of economic issues, the announcement said.

Inquiries and complaints submitted through ASCS county offices to IRS district or subdistrict offices may be forwarded to OEP regional offices or to the OEP national office for further consideration, it was indicated.

The normal function of the ASCS county offices is to administer farm programs of the U.S. Department of Agriculture on the local level. This primary function will continue, USDA officials stressed.

County ASCS offices are in the process of receiving official replies to common questions bearing on the Presidential directive, USDA officials said.

Larry High is Named to Receive FFA American Farmer Degree

A Lancaster youth's farm program, centered around turkeys and steers, has earned him FFA's American Farmer degree.

He is Larry L High, 2490 Creek Hill Road, Lancaster, a 1968 graduate of Garden Spot High School.

Only one out of every 1,000 FFA members qualify for the American Farmer Degree and Larry is one of only 10 FFA members from throughout Pennsylvania selected for the honor this year

He also was selected as Pennsylvania's representative for the North Atlantic Regional Star Farmer award

High recently bought a 100 acre farm at Rheems from Paul Wipple The farm includes a house, barn and silo

High plans to erect an 18,000 to 20,000 unit turkey house and move his entire operation to the new farm.

The plans include about 100 to 150 steers a year. This year he grew six acres of tobacco He will cut back on the tobacco

But he will make his own feed for his turkeys

His operation previously has consisted of rented land, including five acres from his father, Harvey L High, 346 E Main St, Bareville, 50 acres from Paul Leaman and aout 42 acres from John Martin. This year the entire Martin acreage was planted in corn About 30 acres of corn and 40 beef cattle were carried on the Leaman acreage.

The present turkey house is located on his father's land. He now has 7,000 turkeys slated for the Thanksgiving and Christmas holidays.

High's turkey operation is geared toward the New York and Philadelphia markets for the Jewish Kosher trade. This enables him to get one to two cents above market price, one of his keys to success with turkeys

Earlier this year, he sold 7,000 for the Easter-Mother's Day trade

He says he gets better returns by dealing with small independent buyers who buy in small lots of 100 to 200 birds, although sometimes he sells as many as 1,000 at a time

But this type of marketing program places heavy emphasis on having and maintaining markets

High is a good mechanic and maintenance man and makes and repairs most of his own equipment

Early this year, he bought a second hand field sprayer for $75 and restored it. Young High noted that a new one would have cost him about $350 to $400

He considers good banking connections important and deals with the Leola National Bank

Located in the Conestoga Valley School District which doesn't have a vo-ag program, High had to provide his own transportation to participate in the outstanding ag program at Garden Spot High School.

He is married to the former Shirley Stauffer of Lititz

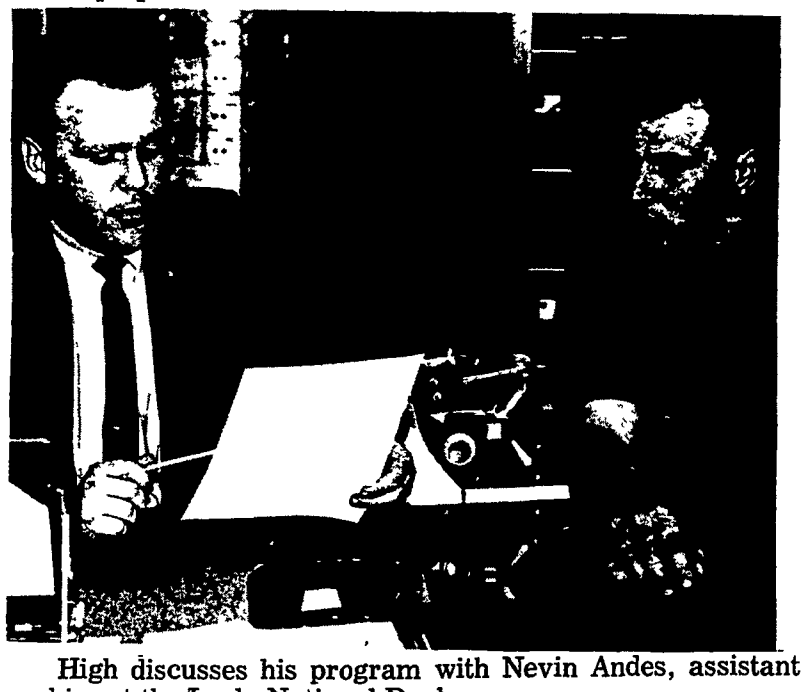
Active in the Grassland FFA Chapter, he served as sentinel and treasurer and was a member of the state FFA chorus. Exhibiting his livestock and poultry at local and state events, he received the FFA foundation award for outstanding achievement in poultry production.

He also placed first in the state PP&L Farm Electrification and Mechanics Contest for a horse trailer he designed and constructed

A member of the county 4-H livestock judging team in 1968, he helped that year's team place third in the nation at the Chicago National Exposition

He is an active member of the Garden Spot Young Farmers, Pennsylvania Turkey Federation and the Pennsylvania Poultry Federation.

Donald Robinson, Garden Spot Young Farmer instructor, helps High make proper adjustments on his spray equipment.



High discusses his program with Nevin Andes, assistant cashier at the Leola National Bank.

High adjusts some equipment on his 7,000 unit turkey house.

Larry L. High, shown outside his 7,000 unit turkey house, has been named to receive the American Farmer Degree.

The American Farmer Degree winner is assisted by his wife, the former Shirley Stauffer.

Farm Women Societies

Society 23

Farm Women Society 23 met recently in the home of Mrs. Barbara Nissley, Washington Boro RD1.

The Society voted $25 each to the County Project, Child Development Center; the State Farm Women Scholarship Fund, and to the Nutritional Program administered by the County Agricultural Extension office. A gift of $10 was sent to the Mental Health Association.

Mrs. John Newswanger was in charge of devotions Mrs. Robert Rohrer, president, was in charge of the meeting

Mrs. Glenn Burkholder will represent Society 23 in the Lancaster County Farm Woman of the Year contest.

Plans were made for a refreshment stand to be held at the Hoffmaster Household Sale in Columbia on Sept 11. Mrs Edgar Funk is in charge. Mrs Lester Newcomer was named chairman of the sunshine committee.

The next meeting will be held at Stauffer's of Kissel Hill on Thursday, Sept 23, at 1:30 p m Mrs. Jay Oberholtzer will demonstrate flower arrangements. Society 31 will be guests. Mrs. Jay Charles is in charge of plans and will serve as hostess.

Society 29

Farm Women Society, 29 met recently at the home of Mrs. Richard Garber, Elizabethtown, with members of Society 2 guests at the meeting. Assisting hostesses were Mrs Joe Russell III and Mrs. Clayton Ranck.

The Rev. Dean Bult, New York state, spoke briefly on keeping children out of trouble. He was formerly associated with Teen Encounter, York

During the business portion of the meeting, members voted approval of a $25 donation to the county project. In other business, plans were made to entertain the Alpha Club at the YWCA on Sept. 24.

Members will hold a square dance Sept. 11 at 8 p m. at the farm of Mr. and Mrs. Richard Nissley, Bainbridge RD1. The dance is open to the public. Information on the event may be obtained by contacting Mrs. Jack Garner, Mount Joy RD1.

Next regular meeting of the group will be held Sept. 21 at the Union School House, Elizabethtown. School days will be the theme of the meeting.

Society 28

Farm Women Society 28 held election of officers at a recent meeting at the home of Mrs Jay Groff, Bird-in-Hand RD1 Mrs. Bare was cohostess.

Mrs. William Dean, president, was in charge of the business meeting. Mrs. Roy Book gave devotions.

Mrs. J. Robert Hess was elected president. Serving with her will be Mrs. Harold Rohrer, vice president; Mrs. Jacob Bare, secretary, and Mrs. Elvin Hess Jr, treasurer. The new officers will assume duties in January, 1972.

The program featured a 4-H night with a fashion show, special music and a demonstration.

The next meeting will be held at 7:30 p.m. September 14 in the Farm and Home Center with Society 4 as guests. The Rev. Elwood Mehle will present a sound and light chalk program.

Society 11

Farm Women Society 11 celebrated their 45th anniversary with a dinner at Willow Valley Restaurant.

During the program, a book review was given by Mrs. Lois Stauffer.

Three charter members attended Each past president in attendance gave highlights of their term of office.

Mrs. Esther Musser, president, conducted the meeting. She announced Nan Wiley, the Intelligencer Journal's columnist, will be speaker at a meeting on Oct. 1 at Centerville School. Any Society president may be contacted for tickets.

The next meeting will be held in the Community Building at Mechanic Grove on Sept 30

Society 27

Farm Women Society 27 met recently at the home of Mrs Wilbur Erb, Mount Joy RD1

Highlight of the evening was a white elephant sale sponsored by the ways and means committee Serving as auctioneer was Arthur Wenger

A donation of $25 was voted to the new Nutritional Training Fund set up by the Farm and Home Center.

Tickets are available for the October 1 evening session with well known newspaper food columnist Nan Wiley

The September 28 meeting will be held at the home of Mrs Sam Heineman III, Marietta RD1. Feature for the meeting will be workshops on dried and pressed flowers.

Society 5

Farm Women Society 5 met Saturday, August 28 at the home of Mrs Paul Stern, Manheim. Mrs Stern led the group in a devotional period

Mrs. Hiram Graybill, president, presided over the business meeting. Mrs Wilber Hostetter led the group in singing

Donations were given to the Scholarship Fund of Lancaster County and to the Extension Workers for Nutritional Education.

A food stand is planned for the household sale of Mrs. Polly Hummer, Manheim, on October 2.

Miss Kathryn Eichelberger narrated a series of slides for the afternoons program

The next meeting of Society 5 will be at 1:30 p m September 25 at the home of Mrs Anna Spahr, East Petersburg

PENB Slates Meetings

The 1971 Fall meeting of the Poultry and Egg National Board will be held October 26 and 27 at the Ramada Inn near O'Hare Airport, Chicago, announces Board Chairman Mal Cleland

The 32nd Annual Meeting is to be held April 25, 26 and 27, 1972, at the newly completed Regency-Hyatt House, also near O'Hare Airport.

Ida's Notebook

By Ida Risser

On Sunday afternoon, I and my seven and eleven year old took a walk through the fields and woods on our farm. A jenny wren scolded us and we studied the largest oak tree on our place. We talked of the grapevine swing my sisters and I used long ago.

We identified a large tree along the fence row as an ailanthus It grows to a height of 50 to 80 feet and has leaves similar to a sumac.

I would venture to guess many farm wives do not get out to the fartherest corner of their farms to really see what they are working so hard to keep.

* * * *

We've just finished eating a family of gingerbread cookies Judy made one to represent each of us, plus a cat and dogs

We have an ample supply of pets just now In addition to our own Irish Setter and Border Collie we are keeping a dog and bird for my sister.

I never realized a bird could have so many songs — a happy one, a scolding one and even a whistle of appreciation Tending these animals keeps Cindy busy.

* * * *

There are times when we approve of new super highways and there are times when they break our hearts

I have had to watch the destruction of the house, barn and silo on my home farm to make way for a new highway. Only when we travel a long distance in a short time do we appreciate the new roads.

When we flew to Michigan to get a new car and drove the 600 miles home in exactly 10 hours, we thought the roads were fine

The different approach seems to depend on which side of the fence we view the new transportation facilities

Farm Women Calendar

Saturday, September 4

2 p.m.—Farm Women Society 6, Stevens Hill Church of the Brethren.

Grange Meets

Fulton Grange 66, meeting in regular session August 23, with Richard Holloway, master, conducting the business session. The youth committee made plans to attend a baseball game in Philadelphia August 27, but since the game was rained out they are rescheduling the bus trip for September 28. The youth committee is also in charge of preparing a float for the Southern Lancaster County Community Fair parade September 17.

Fulton and Colerain Grange will have a booth in the commercial tent at the fair at Quarryville September 15-18.

Fulton Grange will again furnish a $25 bond for the third prize for the Harvest Queen contest at the fair which will be held Sept 15.

The following were appointed to secure teams for the Tug-of-War contest to be held September 16 at the fair. Mrs. Jacob Fantom, Mr and Mrs David Knight and Lloyd Welk

David Gentry, phone 548-2922, has been secured for janitor of the Grange Hall and will be in charge of renting the hall

The progressive parties committee reported 84 parties held to date, realizing $1,118 33 for the Southern Lancaster County Family Health Center which will open at Quarryville October 1

Mrs J Stanley Stauffer Jr gave a talk on "Medic Alert" explaining what it is, how people who are alergic to certain drugs or have certain physical ailments can secure the medic alert emblems, the importance of using them, the price of emblems and where to secure them

Gyles H Brown, Pomona Master, gave a talk on "The Grange" as presented on a Columbia radio broadcast this summer R Clair Murphy directed a kitchen band "Barnyard Fiddlers" accompanied by Miss Mary Lou Wesley Taking part were Mrs Beulah Mullen, Mrs Jacob Fantom, Mrs Susan Fite, Mrs Charles McSparran, Mr and Mrs J Everett Kreider, Richard B Lefever, Gyles Brown, Arba Henry, Clifford Holloway Jr, Earl Smoker and Lloyd Welk

There will be election of officers at the next meeting September 13 and a 5" x 7" photo contest

Md. Begins Horse Vaccination

Maryland Animal Health Department officials, in cooperation with the U.S. Department of Agriculture, have approved a program of vaccination for horses against Venezuelan Equine Encephalomyelitis (VEE), the "sleeping sickness" virus that recently caused the death of hundreds of horses in Texas.

At the same time, animal health officials announced modification of the existing quarantine to allow importation of horses from states where VEE exists, providing the horses have been vaccinated at least 14 days prior to importation. Restrictions have also been lifted on importing horses from states where VEE vaccination programs are in effect. However, any horse coming into the state must be accompanied by an official health certificate as is required by present regulations.

The state vaccination program will be voluntary, Dr. Thomas Ladson, state veterinarian, points out, and there will be no cost to the horse owner. The USDA will supply the vaccine and reimburse practicing veterinarians for administering it.

"We are shooting for a beginning date of September 7," Dr. Ladson adds. By that time enough vaccine will be available for all the horses, ponies, mules and asses in the state. There will be a definite cut-off date for the free federal-state program. Officials hope that the vaccination program can be completed in one month.

Commercial vaccine will be available and horse owners may have veterinarians vaccinate horses at the owner's expense at any time.

"Details of the program are not yet complete," Dr. Ladson says, "But we will keep horse owners informed as the program develops."

He pointed out that while an emergency does not now exist, vaccination is an "insurance program" to protect the state's horse industry and the people of Maryland.

Recent experience in Texas has shown the vaccine to be safe and effective in controlling and cantaining the disease, and treated horses have shown no undesirable side effects.

Maryland is one of nine states to be involved in the USDA vaccination program; the others are Delaware, New Jersey, Virginia, North Carolina, South Carolina, Tennessee, Kentucky and parts of Missouri.

Pomona Grange Has Picnic

Approximately 60 people attended the Lancaster County Pomona Grange picnic August 21 at Holtwood Athletic Field Park, hosted by Colerain Grange.

Gyles H Brown, Pomona Master, conducted a brief business meeting The Women's Activities Committee reported serving the Little Britain Alumni banquet in June

There will be a county Grange visitation meeting at Quarryville Fire Hall at 8 p m September 21, with Colerain Grange as host Salisbury Grange will present the program and Fulton Grange officers will open and close the meeting

A committee from Lancaster County Pomona Grange will meet with Chester-Delaware and Montgomery Counties Pomona Granges September 30 to make plans to entertain the Pennsylvania State Grange in 1975.

Jesse Wood reported attending the election of trustees of Penn State University in June

Mrs. Jesse Wood, Lecturer, presented a skit "You Can't Get There From Here" taken part in by Tommy, Joyce and Peggy Galbreath Charles McSparran was in charge of a quoit tournament.

The next meeting will be held at 8 p m October 16 at Fulton Grange Hall, Oakryn, when there will be election of officers Fifth degree will be conferred in charge of Loran Brinton, Mrs Thomas Bradley and Mrs Thomas Galbreath C G McSparran will coach the degree team

Annual Chester County 4-H Roundup Winners Are Announced

4-H Club members from all sections of Chester County exhibited their completed projects at the annual Chester County 4-H Roundup. Members were judged on the quality of work they displayed with each exhibit receiving a blue ribbon for superior work, red for excellent, and white for good In each unit of project work the judges named a grand champion and reserve champion exhibit if he felt it was worthy of such recognition

Named grand champion in two projects were Robert Prettyman, Oxford, tomatoes and field corn, Beth Hutchison, West Grove, strawberries and advance entomology, Donald Nafziger, Phoenixville, junior handyman and unit 1 electricity, Carla Nafziger, Phoenixville, unit 1 photography and unit II wildlife, and Douglas Warren, Chester Springs, poultry and unit II forestry Suzanne Iseminger, Malvern, was named grand champion in unit I forestry and reserve grand champion in unit II vegetables and unit I photography

Cheryl Yoder, Spring City, was named grand champion in unit IV indoor gardening and reserve grand champion in unit II indoor gardening Zachary Iseminger, Malvern, was grand champion in advance philately and reserve grand champion in unit I forestry Dale Nafziger, Phoenixville, received champion honors in senior handyman and reserve champion in soil and water conservation

Other 4-H'ers named grand champions were David Anderson, Pocopson, sweet corn, Robert Minshall, Avondale, unit IV photography, William Richardson, West Grove, unit I wildlife, and Daniel Weinstock, Phoenixville, soil and water conservation

Grand champions in flowers were Colleen Lafferty, Hockessin, Del, unit I, and Debbie Pugantino, Honeybrook, Unit III, in indoor gardening champion honors went to Janet Latshaw, Spring City, unit I, and Marjorie Pyle, Malvern, unit III

In vegetables Dale Davis, Oxford and Becky Robinson, West Grove received champion honors for Unit I and II respectively

Kenneth Squire, Glen Mills and Joseph Kessel, Downingtown received champion honors in Unit II and advance beekeeping project

Named grand champions for entomology were Janet Hutchison, West Grove, unit III, and Randy Blackburn, Oxford, unit I.

In Geology, Leif Lucas and Rod Thompson, both of Downington, received champion ribbons for unit I and II respectively

4-H'ers named reserve grand champions were Mary Prettyman, Oxford, tomatoes, Janet McAllister, Oxford, strawberry, W Hosea Latshaw, Spring City, sweet corn, William Squire, Glen Mills, junior handyman and Evelyn Williams, Landenberg, unit IV photography Reserve champions for flowers were Mary Leszczynski, unit I, and Denise Iseminger, unit 3 both of Malvern Dean Yarnall, Oxford, received reserve champion honors in unit I vegetables Phoenixville brothers Donald and David Miskiewicz received reserve champion ribbons in entomology unit I and II; Larry Thompson, Coatesville, and Frank Walton, Kennett Square, in unit I and unit II wildlife; Kathy Nafziger and Sally Yeager, both of Phoenixville, reserve champion honors in unit IV indoor gardening and advance philately respectively.

Judges for the various projects were Joe Parrett, Longwood Gardens, flowers; George Coller, Soil Conservation Service, conservation projects; Robert Powers Jr, Chester County agricultural agent, photography; Miss Mary McMullan, leader of the Brandywine 4-H Club, philately; Glenn Shirk, associate Chester County agricultural agent, entomology and miscellaneous; and John Rayburn, Longwood Gardens, vegetables.

During the judging, the 4-H members and guests attended a morning assembly with W. Hosea Latshaw, president, Chester County 4-H Council, serving as master of ceremonies. The Pledge of Allegiance was led by Wesley McAllister and 4-H pledge by Holly Scheib, delegates to Pennsylvania 4-H Club Congress.

Hospital

(Continued from Page 6)

probably around 75, maybe up to 100. It is hoped "that the family will stick with one doctor so he can become thoroughly familiar with the family's case history."

He added, however, that since each doctor will be there only one day a week, services of the other clinic doctors and existing Quarryville doctors will be available for cases needing immediate attention.

Dr. Wentz noted that possibly three doctors will be on duty at any one time and that, because this is a training situation, not as many patients can be handled by the individual doctors as would be the case in the typical private physician's office.

Cases will be handled by appointment only, except in an emergency Dr Wentz emphasized that the clinic will not be a hospital and will not be able to handle accidents and serious hospital emergency cases.

While the clinic will handle as many patients as possible, Dr. Wentz emphasized there will be a limit. "When this capacity is reached, we may have to call a limit until the program can be expanded," he said.

The doctors will also limit their practice to the Southern Lancaster County School District area, plus southern Martic and southern Strasburg Townships.

Their fees are expected to be comparable to those charged by existing area doctors

The structure at 1 E Fourth St will be extensively remodeled to provide six emergency rooms, a reception room, business office and nurses' station. Sleeping quarters will be provided upstairs for doctors

The staff will also include a registered nurse and medical secretary.

The remodeling of the property will include enclosing the front porch.

The new physicians who will practice at the new Quarryville clinic include: front, left to right, Dr. John A. Wolgemuth and Dr. Rogers D. McLane; back, Dr. J. Kenneth Brubaker and Dr. R. Clair Weaver. Dr. John W. Breneman, the fifth doctor, was not available when the photo was taken.

When announced in April, the plan was to locate the new family health center in a wing of the Quarryville Presbyterian Nursing Home. The location was changed after it was found that renovations at that site probably could not be completed in time.

Dr. Henry Wentz
Will Direct Doctors

Paul G. Wedel, executive director of Lancaster General Hospital, said, "The General Hospital, assisted by leaders of the Southern Lancaster County community, will be able to move promptly in opening this innovative and much-needed health care facility. In addition to bringing full-time medical care to the local people, it is our hope that the experience gained here will be useful to communities throughout the nation in finding ways to improve the delivery of health care."

Dr Bair described the hospital-sponsored clinics as a growing trend toward providing medical care in rural areas

He said a similar clinic has been in operation in Lambertville, N J , for two years York hospital announced plans in July for a similar teaching facility in Spring Grove

This is 1 East Fourth Street, Quarryville, the new health center building before renovations began this week. The building has been a parsonage. The front porch will be enclosed for office space, including a reception room.

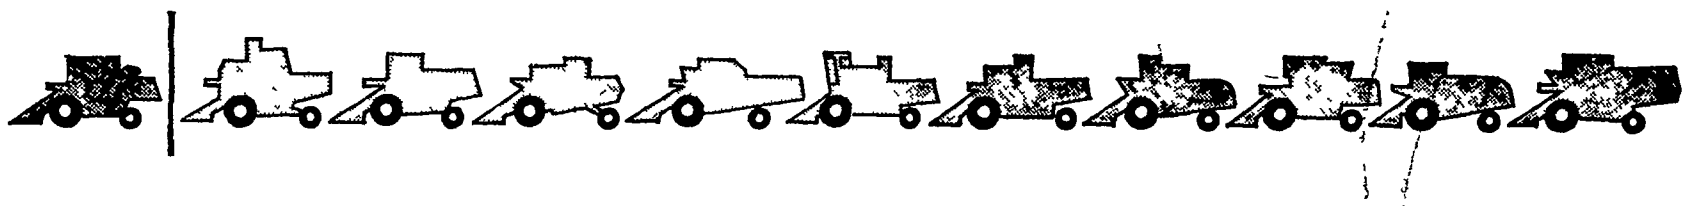
Why is it important to you that GLEANER combine is different from the other ten?



BECAUSE *Gleaner* combines are the only combines specifically designed to cut, thresh, and separate under today's changing field and crop conditions. With a *Gleaner* combine you take more and cleaner grain out of the field in heavy or light crops—dry or wet conditions.

Differences start down front with Sure-Feed. An Allis-Chalmers exclusive! Controls all crops. Like this—

Header auger feeds into a cylinder-width beater. Retractable fingers comb and spread crop over the entire cylinder width. *Gleaner* combines use every inch of rasp bar for full threshing, full capacity morning or afternoon—in heavy or light crops.

Your crop's under full control. Entire action takes only 15½ inches of crop travel. This is the shortest header-to-cylinder delivery of all—every "cut" is under full mechanical control to within one inch of the cylinder! Result—feeding accuracy and threshing capacity unmatched even by the heavyweights.

Our down-front design puts pivot point behind the cylinder—material always feeds at the same angle even while the headers move up or down.

All others pivot ahead of cylinder—resulting in over- or under-threshing. They have a 50 to 98-inch conveyor feed. Any conveyor tends to bunch material at its center, causing uneven cylinder wear.

It's easy to see how *Gleaner* combine down-front cylinder design gives you a much greater separating area, and more capacity everywhere it touches the crop.

Separation begins as wing beater behind the cylinder agitates, fluffs the crop. Air blast from rotating cylinder and beater increases crop agitation. Grain, dust, chaff fall through the straw evenly onto the raddle below. That's early separation, ready for *Gleaner* combine pre-cleaning.

Here's another difference—two-fan cleaning. The others don't pre-clean—they try to do all the cleaning at the shoe. In the *Gleaner* combine, the upper fan directs a heavy air blast through the grain stream as it comes off the raddle—pre-cleans crop before it ever reaches the shoe. Blows dust, dirt out rear.

Second fan finish-cleans the crop at the chaffer and shoe. One fan before the shoe, one fan at the shoe; a bigger, cleaner crop with *Gleaner* combine.

Sure-Feed system; controlled feeding; down-front cylinder; greater separating area; two-fan cleaning system!

These are only some of the *Gleaner* combine differences. See us for more details. Our credit plans make a *Gleaner* easier than ever to own!

COMPLETE MARYLAND HERD DISPERSAL

at the Shady Lane Dairy Cow Stables

Friday Night, September 10

7:30 Sharp

Located ¼ mile West of Quarryville off Oak Bottom Road.

50 Head
Registered and
Hi-Grade Holsteins

This herd consists of 23 head, 10 fresh in the last month, 7 close springers, balance all stages of lactation. Also 25 fresh and close springing cows from Canada, Maryland and Virginia.

Farmers — This is a small herd but I think one of the best dairy quality milking herds I have had for some time with cows milking to 85 pounds per day.

If you want good cows plan to attend this sale.

PROBLEMS ASSOCIATED WITH CATTLE GOING ON FEED

Digestive disorders and a slight transient depression in appetite in newly-arrived cattle in the feedlot have been problems for a number of years. There are numerous causes:

1. The sudden change in type of feed, for example, from grass and milk to grain, silage and/or hay and a protein supplement.
2. Too rapid pushing of grain concentrates.
3. Too much protein.
4. Not enough roughage.
5. Too much high quality roughage.
6. Unpalatable feed.
7. Too much green chopped legume or grass silage.
8. Feeding soft or immature corn. If not moldy, soft corn is satisfactory, but animals must be accustomed to it gradually (Morrison).
9. Too much green chopped corn causing green corn poisoning.
10. Too much silage fed to lighter weight calves. Calves do not have the digestive capacity to obtain their total digestible nutrients from a full feed of silage alone.
11. Digestive disorders caused by infections.

FOR A FLYING START USE
PENNFIELD NO. 701 BEEF STARTER MEDICATED

(5 lbs. per day first 28 days)

An aid in maintainance of weight gains in presence of respiratory disease such as shipping fever.
